- **we provide transport service** - we offer shipment services of our logistics department which will find the right method of transport for you, prepare documentation and complete formalities
- **support of marketing activities** - we provide you with products in various, visually attractive packaging consistent with market trends
- **we are reliable and professional** - years of experience, high standards of manufacture and work according to Quality Management System
- **let's care about the environment around us** - we operate in accordance with CSR (Corporate Social Responsibility)

PHILOSOPHY

*aerosol service aims to become the strategic
business partner of our clients*

We provide comprehensive services to deliver products that meet your specific requirements. We are the only company that produces aluminum packaging and provides services of filling at the same time, which guarantees our expertise in correlation of these two manufacturing processes.

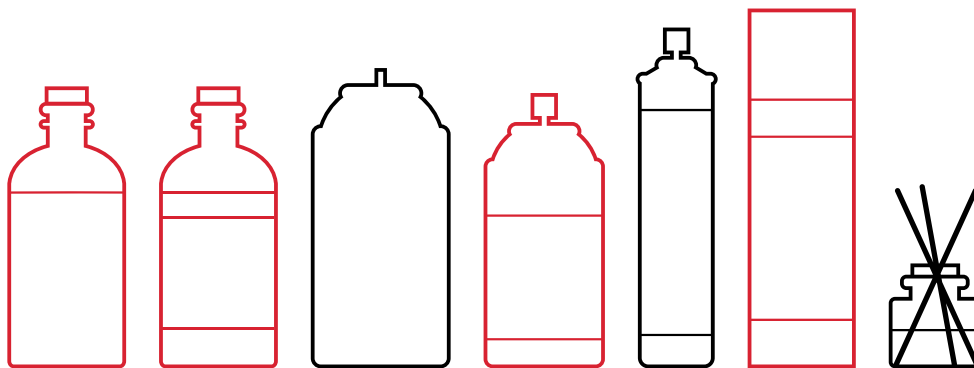

FACTS AND FIGURES

highly diversified activity

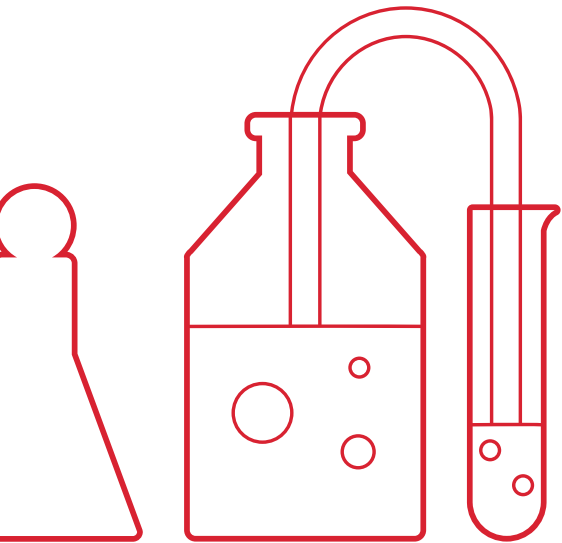

Our reliability and professionalism is proven with these facts and numbers:

- export share over 70%
- centralised production facility
- more than 150 permanent employees
- 4000 m² of production area and 3000 m² of storage area
- over 30 million items of ready goods annually
- over 35 million items of aerosol packaging
- 8 automatic lines that fill aerosols and liquid products
- 2 manufacturing lines of aerosol packaging
- own transport fleet
- specialized internal laboratories to design and formulation tests
- modern blending rooms
- multistage quality control

RESEARCH AND DEVELOPMENT

in-house laboratory dedicated to implementing innovative, safe and technically perfect products

Due to a flexible approach and advanced research methods, Aerosol Service quickly reacts to the changing needs of clients.

Team of specialists focus on the development of new products through:

- trends research
- close cooperation with institutions which validate products
- developed base of suppliers and experts network
- providing a high level of protection of human health and the environment

QUALITY ASSURANCE

integrated quality management system

Standards of the Quality Management System are followed at every level of the organization. Starting from the risk analysis of projects, through regular audits of processes, finishing with multilevel quality control.

It covers:

- risk analysis system based on FMEA
- rigorous inspections of incoming materials and components
- use of microbiological and physicochemical tests to keep all products safe
- permanent monitoring of the most important parameters in a manufacturing process
- absolute traceability of each product

In addition to quality policy, Aerosol Service also meets the highest standards set by international guidelines:

- ISO 9001:2008 (Quality Management System)
- ISO 22716:2007 (Cosmetics Good Manufacturing Practices)
- REACH and CLP requirements

URS is a member of Registrar of Standards (Holdings) Ltd.

PRODUCTION

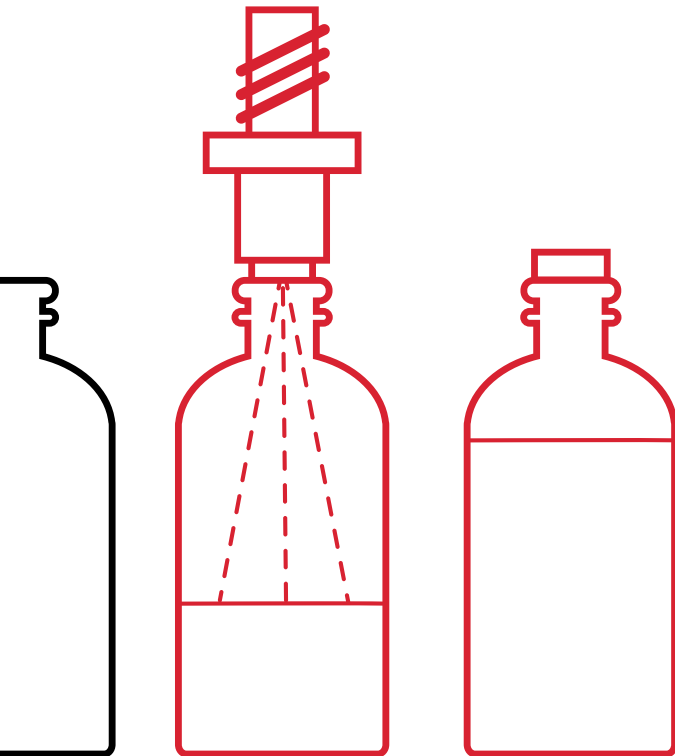

adaptative and flexible production facility

Aerosol Service is proud to be able to offer outstanding flexibility regarding the time of delivery of a product, size of a batch and packaging. Thanks to highly efficient, dedicated filling lines 30 million items are manufactured every year.

The production facility is oriented towards:

- aerosol filling – diameter 35-66 mm, capacity 30-750 ml
- mini-spray filling – diameter 22-26 mm, capacity 5-50 ml
- liquid filling - capacity 50-1000 ml, into containers made of glass, PET, PU and many others
- custom packaging of ready products in blisters, display assembly, promotional bundles, gift packs and others

In the whole range of products it is possible to use different diffusers and applicators.
